# Jacks, Levelers & Ride Control

*Special Product Focus*

If you're customers are off-kilter when parked or on the road there's a good chance it's because they don't know jack. Or all about jacks, levelers and ride control, to be more specific.

For more information on any of the products in this section, simply visit the company's Website, conveniently located at the bottom of each respective listing.

## 3,500-Pound Electric Tongue Jack Features LED Night Light, Emergency Crank

Stromberg Carlson, Traverse City, Mich., introduces its new electric tongue jack, model #JET-3500. The company's 3,500-pound electric tongue jack has 18" of travel and a removable footpad. There is a large three bulb LED night light and an emergency crank through socket on top. The 30-amp fuse is external of the jack for easy access. This product was recently redesigned by Lippert Components and is now available in the aftermarket through Stromberg Carlson.

## An Alternative to Flimsy Jack Feet Using Wood Blocks

Fastway Trailer Products, Provo, Utah, introduces the Fastway Flip, which eliminates the hassle of extra wood blocks, kneeling down to move a pin, or using a flimsy removable jack foot. The Flip jack foot installs easily and stays permanently attached. The Flip automatically flips up and down as the jack extends or retracts. It adds 6" instantly. The Flip jack fits 2 1/4" jacks with a 2" outside dimension inner tube, round or square. It is rated for 1,400 pounds maximum tongue weight.

### Made in the U.S.A. Leveling Blocks

Tri-Lynx Corp., Irving, Texas, presents its Lynx Levelers, which uses interlocking blocks to achieve the required lift to level any RV. The levelers measure 8-1/2" by 8-1/2" by 1-1/2" inches thick and are available in 10 packs (which come with a handy storage bag) or four packs. Tri-Lynx has two additional items to complement the Lynx Levelers – an interlocking wheel chock (Lynx Stop 'n Chock) and the LynxCap. The leveling blocks are made in the U.S.A. and come with a three-year warranty.

### Remote RV Leveler Offers Convenience

CIPA-USA, Port Huron, Mich., presents the RV Leveler, which uses wireless remote readings to indicate the state of levelness of an RV. The base communicates via radio frequency with a handheld remote that operates 30-plus feet away, eliminating the need for a second person. The user simply places the base inside the RV and carries the remote to each leveling point; a four-light display on the remote indicates where adjustments are needed via illumination of green (level) or red (unlevel) LEDs.

### System Simplifies the Leveling Process

LevelEase, Rancho Santa Margarita, Calif., presents its LevelEase leveling product for fifth wheels. With the single push of a button, LevelEase moves the fifth wheel to the proper position for connecting, disconnecting and level. LevelEase remembers the exact positions, regardless of terrain. And once the user is hitched up and ready to break camp, they simply touch the "retract" button and the legs will automatically return to the travel position. LevelEase is wired directly in place of the factory extend and retract switch.
